Re: Contract for runway rehabilitation engineering

Presented for your consideration at the next City Council meeting is a contract with airport consultant Prein & Newhof for engineering the planned runway rehabilitation project.

This project has been on our Capital Improvement Program list for several years, and is intended to protect the long-term integrity of the concrete runway through joint sealing and other basic maintenance.

Aside from the project details, this contract is identical in form and language to the most recent contract with Prein & Newhof which was reviewed and approved by City Attorney Hitch.

I am requesting its approval by the City Council.
