

**City of Charlotte**  
**Warning System Siren Upgrade Bid Tab**

The City of Charlotte received bids for an outdoor warning siren upgrade as per our specifications. Following are the bids received:

West Shore Services, Allendale, MI	\$69,900.00
Braniff Communications, Crestwood, IL	\$70,868.00
Federal Signal, University Park, IL	\$90,857.00

West Shore Services have been in the business for over 40 years and we see no problem with them. The City will be responsible to obtain the electrical permit from Eaton County and we will also be responsible to pay Consumers Energy for the electrical drop that they will need to run for the new location of the north siren. The total cost of everything will be less than \$75,000.00.
